

How do I reference ASCEND for a paper or presentation?

Last Modified on 18/02/2026 4:29 am EST

We are happy to hear that the ASCEND by BenchSci platform has been useful for your research!

Users can reference ASCEND the same way you would reference any **website or database** using your citation style of choice such as **MLA** or **APA**. Scientists have also cited BenchSci inline by putting our URL in brackets within the body of their articles (see this inline example [<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7408661/>]) and by referencing our URL in their footnotes (see this footnote example [<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7807291/>]).

Feel free to use and adapt the copy below to include in your manuscript, report, or slide deck. If you have any questions, please [reach out to us!](#)

Choosing reagents

We leveraged **ASCEND by BenchSci**, a preclinical research platform using publicly available, licensed, and integrated internal experimental data to identify relevant and validated reagents and model systems.

Experiment history

We leveraged **ASCEND by BenchSci**, a preclinical research platform using publicly available, licensed, and integrated organization-wide experimental data to streamline literature review, hypothesis validation, and decision-making throughout the project.
